## Education

---

### DYPCOEL, Talegaon Pune

Jan 2022 – May 2025

BE in Computer Science

- GPA: 7.0/10.0
- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theory

## Projects

---

### formly.live - Form Builder

[formly.live](#) 

- Developed a dynamic form builder application, allowing users to create and publish customizable forms for end users.
- Intuitive drag-and-drop interface for field selection.
- Support for various field types (e.g., text, dropdowns, checkboxes).
- Real-time preview and validation.
- Backend for storing and retrieving form data securely.
- User-friendly dashboard to manage published forms and responses.
- Technologies Used: Next.js, TypeScript, Tailwind, Shadcn/ui, Prisma, PostgreSQL.

### ZapEase - Workflow Automation Platform

[Github](#) 

- Developed ZapEase Zapier-inspired platform for creating, managing, and executing automated workflows using a microservices architecture.
- Automated workflows with customizable triggers and actions.
- Scalable microservices architecture for reliability and efficiency.
- Services: User management, trigger execution, workflow monitoring, and action processing via Kafka.
- Technologies Used: Node.js, Express, TypeScript, Next.js, Turborepo, Kafka, PostgreSQL, REST APIs, Microservices Architecture.

### Zomato - Clone

[Github](#) 

- Developed a platform replicating the core functionalities of Zomato, enabling users to explore restaurants, view menus, and log in.
- User-friendly interface to browse and search for restaurants by location or cuisine.
- Implemented secure user authentication and personalized profiles.
- Backend for managing restaurant data, user information, and menu items securely.
- Technologies Used: (MERN) Node.js, Express, MongoDB, React.js, JWT and bcrypt for authentication.

## Technologies

---

- **Languages:** Java, JavaScript, TypeScript, SQL
- **Frameworks:** Node.js, Express, Next.js, React.js
- **Tools:** Kafka, Docker, Prisma, Git, CI/CD
